

# Installation instruction for Original Marzari metal replacement plates

Stand: 2016

## Marzari - Typ Ton

### 1. a)

Requirements: A level under construction is very important raise the height of the Batten when necessary.

### b) Insert the metal replacement plate.

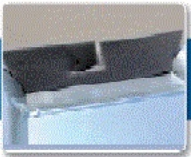

c) With color-coated material, remove protective film!

2. If necessary secure it with nails.

3. Set the correct position for the stainless steel hooks and secure them.

4. Press down the edge of the replacement plate a little if necessary.

5. Stick on the foam wedge and cut it as shown in a separate instruction page.

6. Mount in position the stainless steel hooks.

7. Replace the surrounding roof tiles.

8. Bend the lead Apron into place.

### Important Note!

Be sure to choose and order the correct replacement plates matching to your original roof tiles.

We would be happy at any time to advise you in your choice.

We would recommend you to choose high-quality materials (for example our colour Galvanized coated steel plates) to avoid the natural corrosion process.

You can find all further information in our Homepage.
